RELEASE AND UNWIND

Directions to Loggerhead Club & Marina® – South Lantana

By Water: (VHF Channel # 16)

-  You can access Loggerhead Club & Marina - South Lantana by water off the Intracoastal Waterway. From the south, enter the Intracoastal Waterway utilizing the Boynton Inlet (fixed bridge with 16-foot clearance). Head north, and approximately 1/2 mile north of the Ocean Avenue Bridge, you will see our sign in the Intracoastal Waterway. Turn left (west) and the marina is located straight ahead due east of The Moorings condominium complex (multicolored cluster of buildings).
-  Access from Lake Worth Inlet to the north is provided via the Intracoastal Waterway. Head south near Palm Beach Island or follow the markers along the mainland. You will pass under four bridges. Look for the Loggerhead Club & Marina sign in the Intracoastal Waterway. Turn west and you will see the dock and dry storage barn.

By Land:

-  From I-95 take exit 61 (Lantana Road) and go east to U.S. 1 (approximately 1.1 mile). Turn north on U.S. 1 and stay in the right lane. The Moorings condominium complex will be on the right side (east) of U.S. 1 (approximately 0.4 mile). Turn right into The Moorings and the marina will be straight ahead at the end of the buildings.

Marina Information

Dock/Rack Layout

-  This marina has a total of 80 wet slips that can accommodate boats from 40 to 80 feet in length. There are also some slips that can accommodate boats up to 120 feet in length.

Marine Fuel

-  The Loggerhead South Lantana Marina currently does not offer fuel. However, the close by Loggerhead Lantana Marina does offer ValvTect non-ethanol gasoline.

Marina Depth

-  The Marina has a depth of 7 feet at mean low water.

In the Event of an After-Hours Emergency

-  The marina office phones are forwarded nightly to an answering service. The service will contact the harbormaster or another Loggerhead Club & Marina official in the event of an emergency. If the incident involves an injury or the law is being broken, please dial 911. A call to the marina office will also be appreciated.

HURRICANES AND TROPICAL STORMS
Hurricanes, tropical storms and other major storms may cause considerable damage to marine structures, aids to navigation and moored vessels, resulting in submerged debris in unknown locations.
Charted soundings, channel depths and shoreline may not reflect actual conditions following these storms. Fixed aids to navigation may have been damaged or destroyed. Buoys may have been moved from their charted positions, damaged, sunk, extinguished or otherwise made inoperative. Mariners should not rely upon the position or operation of an aid to navigation. Wrecks and submerged obstructions may have been displaced from charted locations. Pipelines may have become uncovered or moved.
Mariners are urged to exercise extreme caution and are requested to report aids to navigation discrepancies and hazards to navigation to the nearest United States Coast Guard unit.

WARNING
The prudent mariner will not rely solely on any single aid to navigation, particularly on floating aids. See U.S. Coast Guard Light List and U.S. Coast Pilot for details.

NOTE A
Navigation regulations are published in Chapter 2, U.S. Coast Pilot 4. Additions or revisions to Chapter 2 are published in the Notice to Mariners. Information concerning the regulations may be obtained at the Office of the Commander, 7th Coast Guard District in Miami, Florida, or at the Office of the District Engineer, Corps of Engineers in Jacksonville, Florida.
Refer to charted regulation section numbers.

CAUTION
SUBMARINE PIPELINES AND CABLES
Charted submarine pipelines and submarine cables and submarine pipeline and cable areas are shown as:
Pipeline Area
Cable Area
Additional uncharted submarine pipelines and submarine cables may exist within the area of this chart. Not all submarine pipelines and submarine cables are required to be buried, and those that were originally buried may have become exposed. Mariners should use extreme caution when operating vessels in depths of water comparable to their draft in areas where pipelines and cables may exist, and when anchoring, dragging, or trawling.
Covered wells may be marked by lighted or unlighted buoys.

HEIGHTS
Heights in feet above Mean High Water.
CAUTION
Temporary changes or defects in aids to navigation are not indicated on this chart. See Local Notice to Mariners.
CAUTION
Improved channels shown by broken lines are subject to shoaling, particularly at the edges.
CAUTION
Small craft should stay clear of large commercial and government vessels even if small craft have the right-of-way.
All craft should avoid areas where the skin divers flag, a red square with a diagonal white stripe, is displayed.
